- CAT 793F
- CAT 793 (current model)

**CAT 793D Rear Axle Mag-Shield® X
Installation Location**

FEATURES & BENEFITS

Mag-Shield® X is a magnetic canister style in-line filtration solution that offers many benefits in the CAT rear axle application:

- Easy to install – kit includes custom installation bracket, hose build sheets & fastening hardware
- Easy to maintain – built in cleaning tool simplifies servicing
- Maximizes availability – eliminates premature OEM filter plugging & alarming
- Reduces cost – extends oil, OEM filter & component life
- Maximizes protection – captures ferrous contaminants down to 0.1 microns in size while maintaining extremely low pressure drops
- ESG advantages – minimize carbon footprint by extending life of fluid, filter & components
- Large holding capacity – captures and holds 264g of ferrous material
