

Application CAT D6T Dozer
Product Mag-Shield®
Market Construction

INTRODUCTION

MagShield® is pleased to announce the availability of our range topping in-tank magnetic pre-filtration kit for the CAT D6T Dozer. Easy to install and maintain, **Mag-Shield®** is a no compromise solution that offers industry leading protection against ferrous contamination.

CAT D6T Mag-Shield® installation.

FEATURES & BENEFITS

Mag-Shield's unique design offers many benefits in the D6T application:

- Easy to install – custom components engineered specifically for the D6T are designed to snap into place without fasteners
- Easy to maintain – cleaning is only necessary at major service intervals or after a failure
- Captures 100% of oil flow without restricting pump suction
- Keeps oil cleaner extending its life
- Extends the life of media filters and hydraulic components
- Minimises the impact of hydraulic component failures by capturing and containing ferrous debris in the hydraulic tank
- Dramatically reduces repair time and costs
- Dramatically reduces the probability of secondary failures caused by stubborn, residual ferrous contaminants that cannot be removed by traditional cleaning methods
